

To **upload files** through the DIY Web Edit please follow the following steps-

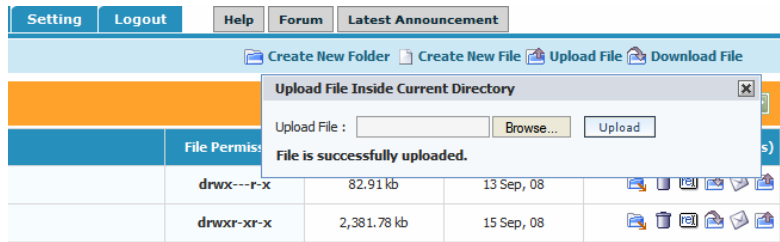

1. At first click on the link Upload File.

2. Then click browse and select the file which you want to upload.

3. Then click **Upload** [After successful upload you will get a message 'File is successfully uploaded'].

4. Then check your websites file listing. You will find your uploaded file [For testing I have uploaded testpage1234.html into your websites directory].
